EDUCATION

- **JSPM ICOER, Wagholi, Pune.** _University of Pune_
  Bachelor's of Engineering in Computer Science _Aug 2013 - May 2016_

EXPERIENCE

- **ValueLabs LLP (2Y)** Technology Analyst
  Client: Cox Automotive _Feb 2022 - Present_
  - Aligned feature development with business goals through collaboration with product managers and stakeholders. Prioritized new features and gathered feedback for continuous improvement.
  - Led the implementation of cutting-edge optimization techniques to significantly improve key performance metrics including loading times, and rendering speed.
  - Applied effective project management strategies, including task allocation, code review processes, and performance evaluations, to ensure efficient project delivery and team success.
  - Collaborated with cross-functional teams to conceptualize, design, and execute innovative solutions, fostering effective communication and synergy across departments.
  - Documented development processes, coding standards, and best practices to streamline onboarding for new team members

- **Infosys (2Y)** Technology Analyst
  Client: HSBC _Oct 2020 - Feb 2022_
  - Collaborated with stakeholders to prioritize tasks, ensuring timely project delivery while acting as a liaison between the development team and stakeholders.
  - Led and supported a team of 3 junior developers in ReactJS web application development, providing guidance, technical solutions, and strong leadership throughout the project lifecycle.
  - Implemented version control systems such as Git to manage codebase efficiently, ensuring collaboration and seamless integration of new features in a fast-paced development environment.
  - Written comprehensive testing using Jest and React Testing Library to validate the functionality and behaviour. Ensuring high code quality and minimizing regressions.

  Client: Movement Mortgage Feb 2020 - Sept 2020

  - Developed a monorepo (architecture) component library for scalability, and responsive UI/UX design, derived from given wireframes.
  - Executed the Error-Boundary component to handle the errors without breaking the web application.
  - Composed Redux Saga for managing complex asynchronous logic, ensuring consistent handling of API requests and responses.
  - Played a pivotal role in code reviews, offering valuable feedback to improve coding practices and foster ongoing development within our team, all in alignment with our shared vision.

- **India Property Cart (3Y 9M)** Front-End Developer
  Project: Real Estate CRM System _Jun 2016- Jan 2020_
  - Implemented optimization techniques to significantly improve key performance metrics including loading times, rendering speed, and overall responsiveness while considering cross-browser compatibility.
  - Collaborated with cross-functional teams including designers, product managers, and QA engineers to deliver high-quality solutions within project timelines.
  - Implemented RESTful APIs using Node.js and Express.js to facilitate seamless communication between the front-end and back-end systems.
  - Collaborated with cross-functional teams to conceptualize, design, and execute innovative solutions, fostering effective communication with back-end and synergy across departments.

PROGRAMMING SKILLS

Frontend: ReactJS, Next Js, Typescript, Redux, JavaScript ES6, HTML 5, CSS, SCSS,
Back-end :NodeJs, ExpressJs
Testing: Enzyme, Jest, React Testing Library Unit testing, Integration testing, debugging with dev tools
Software Development Tooling: JIRA, Confluence, Scrum, Agile methodology
Web Devlopment:jQuery, DOM, Bootstrap, Tailwind, Webpack, Babel, UI / UX, npm, JSON, tdd, PHP, WordPress, XML.
Version Control Tools : Git, Github, TSF.
